Short description

I build solid web environments for different use cases. My goals when writing applications are clean and maintainable code, scaleability and use of modern technologies

Work experience

04.2022 – Now	**jacando AG** – Full stack developer – 70% MongoDB, NodeJS, ReactJS, Apollo, GCP, Docker Managing translations processes for multiple projects Improving noSQL db performance Building microservices and containerization
09.2020 – 02.2022	**jacando AG** – Junior Full stack developer – 70% MongoDB, NodeJS, ReactJS, Apollo, GCP, Docker Managing translations processes for multiple projects Improving noSQL db performance Building microservices and containerization
08.2019 – 08.2020	**jacando AG** – Intern developer – 100% MongoDB, NodeJS, ReactJS, Apollo Refactoring old code to newest technologies Fullstack features implementation

Studies (CH)

09.2020 – Now	**FHNW** – BSc – Computer Sciences University of Applied Sciences Northwestern Switzerland
2016 – 2019	**BBB** – EFZ – Swiss certificate of proficiency Computer Sciences Berufsfachschule Baden (Vocational School)
2016 – 2019	**Kanti** – BM – High school graduation Kanti Baden (Highschool)
2015 – 2016	German course A1–C1 Interim year language course

Studies (IT)

2012 – 2015	**ITIS EM** – BM – High school graduation Itis Ettore Majorana (industrial technical institute)

Teaching experience

2018 – Now	**Math teacher** Private Math lessons for 13–18 y/o students

Skills

Programming languages and frameworks

Proficient in: MongoDB, Go, NodeJS, Kotlin, ReactJS, SvelteJS
Familiar with: Angular, Java, C++, Python, SQL

Software

Git, Docker, GCP

Languages (proficient)

English, German, Swiss–German, Italian

Hobbies

Piano, Music, Travelling, and of course Programming
