Short description

> *I build solid web environments for different use cases. My goals when writing applications are fast, clean and maintainable code. Scaleability is nowadays the basic foundament which must be taken seriously: if it doesn't scale, it has not future.*

Work experience

02.2022 – Now	**jacando AG** – Backend developer – 80% (MongoDB, NodeJS, ReactJS, Apollo, GCP, Docker, Go): managing translations processes (CI) for multiple projects, improving noSQL db performance, code architecture, building services and containerization
09.2020 – 02.2022	**jacando AG** – Junior full-stack developer – 70% (MongoDB, NodeJS, ReactJS, Apollo, GCP, Docker): managing translations processes (CI) for multiple projects, improving noSQL db performance, building services and containerization
08.2019 – 08.2020	**jacando AG** – Intern developer – 100% (MongoDB, NodeJS, ReactJS, Apollo) refactoring old code to newest technologies, fullstack features implementation

Studies

09.2020 – 07-2024	**FHNW** – BSc – Computer Sciences | University of Applied Sciences Northwestern Switzerland
2016 – 2019	**BBB** – EFZ – Computer Sciences | Berufsfachschule Baden (Vocational School)
2016 – 2019	**Kanti** – BM – High school graduation | Kanti Baden (Highschool)
2015 – 2016	German course A1–C1 (Interim year language course)
2012 – 2015	**ITIS EM (Italy)** – BM – High school graduation | Itis Ettore Majorana

Skills

Programming languages and frameworks

Proficient in: MongoDB, Go, NodeJS, Kotlin, ReactJS
Familiar with: Rust, Astro, Java, C++, Python, SQL

Software

Git, Docker, GCP, Nvim

Languages (proficient)

English, German, Swiss–German, Italian

Hobbies

Piano, Concerts, Gaming, Travelling
