Work Experience

- | | |
|-------------------|--|
| 08.2024 – Present | Coop – IT Business Analyst (System Architect & Technical PO) Full-Time (100%) <ul style="list-style-type: none">• Migrated legacy, static on-premise Tomcat stacks into a distributed, cloud-native containerized architecture.• Slashed price calculation latency by 95% (5s to 250ms) via infrastructure and architectural optimizations.• Scaled and maintained high-availability hybrid services for 40k+ live scanning devices and mobile apps Swiss-wide.• Developed high-performance internal infrastructure scripts and automation tools using Rust. |
| 02.2022 – 07.2024 | jacando AG – Backend Developer Part-Time (80%) <ul style="list-style-type: none">• Optimized MongoDB performance and complex aggregation for data-heavy HR software.• Built, containerized, and deployed highly scalable services utilizing Go, NodeJS, Docker, and Google Cloud Platform (GCP).• Engineered automated CI/CD pipelines for multiple concurrent projects. |
| 09.2020 – 02.2022 | jacando AG – Junior Full-Stack Developer Part-Time (70%) <ul style="list-style-type: none">• Implemented core full-stack features utilizing NodeJS, ReactJS, Apollo GraphQL, and MongoDB.• Supported the engineering team in containerization workflows and localized database performance optimizations. |
| 08.2019 – 08.2020 | jacando AG – Developer Intern Full-Time (100%) <ul style="list-style-type: none">• Successfully refactored legacy codebases into modern tech stacks, improving application maintainability. |

Education

2020 – 2024	FHNW (University of Applied Sciences Northwestern Switzerland) BSc in Computer Sciences
2016 – 2019	Berufsfachschule Baden (BBB) & Kanti Baden (Switzerland) EFZ in Computer Sciences & Berufsmaturität (High School Graduation)
2015 – 2016	Interim Language Year (Germany) Intensive German Language Course (A1 to C1 proficiency)
2012 – 2015	ITIS Ettore Majorana (Italy) Berufsmaturität / Technical High School Graduation

Core Competencies

Enterprise Architecture & Scale

Proven track record designing and maintaining highly available, cloud-native distributed topologies capable of handling massive transactional volumes. Specialist in container orchestration and microservices design.

System Modernization

Deep experience executing complex migrations from static on-premise legacy stacks to distributed, scalable Kubernetes cluster environments.

Performance Engineering

Expert at minimizing system latency, removing network bottlenecks, and optimizing resource efficiency at the infrastructure and systems levels.

Technical Leadership & Product Alignment

Experienced in bridging the gap between low-level engineering execution and high-level product strategy, ensuring software design meets critical business timelines.

Skills & Languages

Programming Languages & Frameworks

- **Proficient:** Rust, Go, NodeJS, MongoDB, Kubernetes (k8s), Docker, GCP
- **Familiar:** SQL, Java, C++, Python, Kotlin, Svelte, React

Software & Tools

- Linux (Arch poweruser), Git, Neovim, k3s, helm

Languages

- **English:** Full Professional Proficiency
- **German / Swiss German:** Full Professional Proficiency
- **Italian:** Native Speaker
- **Spanish:** Elementary Proficiency (Actively Learning)

Hobbies & Interests

- Dancing (Bachata / Salsa), Gardening, Piano, Inline-Skating
